

ARPIT MERCHANT

- CONTACT** A336, Exactum
Department of Computer Science
University of Helsinki
PL 68 (Pietari Kalmin katu 5), Helsinki, 00014, Finland
Email : arpit.merchant@helsinki.fi
Web : <https://www.arpitmerchant.com/>
- RESEARCH INTERESTS** I am broadly interested in Network Science, Machine Learning, and Computational Social Science. My research aims to develop and analyze algorithms for low-dimensional graph embeddings that are guaranteed to be robust when deployed for applications in social and information networks.
- EDUCATION**
- | | |
|--|----------------|
| Doctor of Philosophy, Computer Science
University of Helsinki
Advisor : Michael Mathioudakis | 2019 - present |
| Bachelor of Technology (Honours), Computer Science with Master of Science, Exact Humanities
International Institute of Information Technology Hyderabad, India
Thesis title : The Use of Trust in Social Machines
Advisor : Navjyoti Singh | 2011 - 2017 |
- PUBLICATIONS**
- Refereed Conference Proceedings**
- [C4] **Merchant A.**, Shah D., Bhatia G. S., Ghosh A., Kumaraguru P. (2019). Signals Matter : Understanding Popularity and Impact of Users on Stack Overflow. In Proceedings of the 30th ACM Conference on World Wide Web. *WebConf* (San Francisco, USA, May 13-17 2019).

EXPERIENCE

Graduate Research Assistant

January 2019 - present

Data Science Lab (with Michael Mathioudakis), University of Helsinki

- Developing principles and formalisms of how robustness interacts with traditional notions of performance and accuracy in the context of low-dimensional network embeddings.
- Using machine learning, deep learning and graph theoretic methods to quantify how brittle algorithms may be to random as well as structural perturbations, uncertainty in the form of noisy or unavailable data, and temporal changes at appropriate levels of granularity.
- Designing novel techniques with theoretical and empirical guarantees, and useful applications towards downstream tasks in mining social and biological networks.

Research Associate

March 2018 - November 2018

PreCog Group (with Ponnurangam Kumaraguru), IIT-Delhi

- Studied the role of game elements such as badges and reputation points in characterizing underlying social qualities like popularity and impact of users on Stack Overflow.
- Applied statistical learning, and time-series analysis methods to empirically quantify and validate the strength of game elements/digital signals on a rich dataset of 3,831,147 users and their activities spanning over a decade.
- Analyzed the presence of costly to earn and hard to observe signals to qualitatively differentiate between highly impactful and highly popular users.

Visiting Research Scholar

September 2017 - February 2019

Machine Teaching Group (with Adish Singla), MPI-SWS, Germany

- Designing novel, state-of-the-art algorithms for teaching a classroom of online projected gradient-descent learners with provable guarantees under complete and incomplete information paradigms.
- Studied applications of machine teaching methods on synthetic and real-world data for binary classification and handwriting improvement tasks.
- Developed Bayesian inference algorithms for detecting fake news in social networks and jointly learning users' flagging accuracy over time.

Junior Research Fellow

September 2016 - July 2017

Network Science Lab (with Anirban Dasgupta), IIT-Gandhinagar, Germany

- Designed versatile algorithms and novel, unbiased estimators for degree distribution and degree-wise clustering coefficients of large graphs.
- Conducted experimental evaluations on public network datasets to obtain close estimates of the actual values, for storage less than 1% of the input graph size.

Google Summer of Code Intern

May 2016 - August 2016

Sagemath (with Johan Rosenkilde and David Lucas)

- Designed computationally efficient methods for atomic representations of elements of skew polynomial rings and for answering basic questions about them.
- Implemented methods for computing combinatorial properties, and for encoding and decoding algorithms for Golay, Gabidulin and Rank-Metric Codes.

Research Intern

May 2013 - July 2013

Tata Institute for Fundamental Research (with Prahladh Harsha)

- Analyzed randomized variants of the deterministic multiple weights update algorithm to show

that the total expected cost is only slightly worse than the best possible strategy in hindsight.

- Surveyed its application to the multicommodity packing flows problem and a high quality approximation efficiently with provable guarantees.

TEACHING & OUTREACH

Teaching Assistant : Undergraduate courses on Introduction to Discrete Mathematics, Introduction to Probability, Optimization Methods. Responsibilities included designing homework assignments, guiding student projects, lecturing, and grading.

Teaching Fellow : Computational Thinking and Applications for Middle and High School Students. Responsibilities included designing curriculum, lecturing, conducting lab sessions.

Science Communication : Skype A Scientist, Theory Reading Group

INVITED TALKS

- Merchant A., Choudhary J., Dasgupta A., Efficiently Estimating Primitive Graph Properties, Max Planck Institute for Informatics, Saarbruecken, Germany. June 2017.
- Merchant A., Rosenkilde J., Lucas D. Rank-Metric Codes in SageMath, Sage Days 75, INRIA Ile-de-Saclay, Paris, France. August, 2016
- Merchant A., Singh N. The Use of Trust in Social Machines, IIIT-H Spring Research and Development Showcase, Hyderabad, India. March, 2016.

SKILLS

Programming : Python, R, C++, C, Cython, SQL, Bash, Hugo

Libraries/Tools : scikit-learn, statsmodels, pandas, NetworkX, tensorflow, git, numpy, scipy

AWARDS & HONORS

- Student Travel grant, ACM IKDD Conference of Data Science (CODS), Indian Institute of Technology, Chennai, 2017.
- Awarded Dean's Merit List (top 5% of the class) for Academic Excellence, 2014.
- Special Commendation Award (second-highest student award at IIIT Hyderabad) for "...exceptional inspirational contributions and for upholding and highlighting the importance of being responsible.", 2015.
- National Research Fellowship, jointly sponsored by IASc, INSA, NASI, India, 2013.
